

12 REASONS TO CHOOSE HERITAGE LOG HOMES

#1 - COMPANY FOUNDED IN 1974

- Over 31 years experience manufacturing log homes for thousands of highly satisfied clients
- Security of dealing with a reputable international company
- A solid history of continuous development and improvement

#2 - PATENTED, SELF-ALIGNING DOUBLE TONGUE-AND-GROOVE SADDLE NOTCH CORNER

- Virtually eliminates air infiltration at corner intersection
- Superior strength and durability
- Unique corner system in our industry
- Self-aligning corner eases and speeds installation

#3 - PATENTED SELF-TIGHTENING, MAINTENANCE-FREE, THRU-BOLT LOG FASTENING SYSTEM

- Controls the settling process better than any other system
- Helps prevent air infiltration
- Promotes proper log settling often hindered by inferior methods like lag bolts and spikes
- Reduces field labor costs
- Reduces construction time
- Saves labor costs in the electrical wiring of your log home
- Gives us the confidence to offer a lifetime warranty on your log home

#4 - LOG-LOK SPLINE & T-JAMB SYSTEM

- Aids with the proper settlement of the log home
- Maintains proper log-to-log alignment
- Stops air infiltration at all joints, windows and doors
- Stops any movement of windows and doors due to settlement

#5 - STATE-OF-THE-ART MANUFACTURING EQUIPMENT

- Insures precise and uniform milling
- Improves the quality and appearance of the final product
- Allows for precise pre-cutting of window and door openings
- Reduces overall costs to our log home clientele by reducing waste

#6 - USING BOXED HEARTWOOD FOR MANUFACTURING YOUR LOG HOME

- Our logs are independently graded "Log Wall 40" – The highest grade available in the industry
- Prevents cracking & reduces checking
- Reduces twisting and warping
- Results in more uniform settling
- Helps insure that every home meets or exceeds all major building codes

#7 - NATURALLY SEASONED MATERIAL

- Dries the log slowly and naturally stabilizing the moisture content
- Maximizes the natural fiber strength of the wood by avoiding damage caused by other drying methods
- Prevents cracking
- Reduces overall costs

#8 - WINDOWS & DOORS AS PART OF THE PACKAGE

- Heritage buys in quantity reducing the cost to the customer
- Built to Heritage specifications and dimensions to insure a high quality and alignment of the thru-bolt system, i.e. reduced labor cost in the field
- Doors are manufactured with exterior jambs to fit each log style
- Doors have lifetime warranty
- Includes as standard Low "E" glass, tilt to clean, double-pane, snap out grilles, full screens, insulated glass

#9 - WINDOW & DOOR UPGRADES

- Pella Windows Long Standing Quality Focus Since 1925
- Maintenance free
- Higher insulation values reducing heating and cooling costs
- Close to same cost as our standard window if you factor in the cost of painting
- Improves appearance to your log home
- Increases your resale value
- Superior window and door system

#10 - IN-HOUSE DESIGN DEPARTMENT

- Lowers cost to the customer
- Able to take customer's ideas and drawings and turn them into their dream house
- Ability to customize the design
- Reduces the overall time table of completing a customer's log home
- Log wall diagrams for ease in construction

#11 - ON-SITE TECHNICAL ASSISTANCE

- On-site personnel to review and check all materials
- Provides valuable assistance during the log erection phase
- Provides on-site answers to any owner/builder questions

#12 - CUSTOMER SERVICE

- If a shortage or mistake occurs, Heritage stands behind it
- Available to answer questions in all phases of construction
- Offers additional products for finishing, maintaining, and decorating your log home

This is your Heritage
